EDUCATION

Galgotias University, Greater Noida, India — Aug 2020 – Jun 2024
Bachelor of Technology in Computer Science and Engineering (AI & ML) — **CGPA: 8.28 / 10**

TECHNICAL SKILLS

Languages:	C++, Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Frameworks & Libraries:	React.js, Next.js, Node.js, Express.js, Tailwind CSS, RESTful APIs, Context API, Redux
Databases:	MySQL, MongoDB, Database Optimization, Query Performance Tuning, Relational Schema Design
DevOps & Tools:	Git, GitHub, AWS, Vercel, PostCSS, CI/CD Awareness, Agile Methodologies
Core Competencies:	Full Stack Engineering, System Design, Frontend Architecture, API Integration, Clean Code

PROFESSIONAL EXPERIENCE

Full Stack Web Development Intern — Dec 2024 – Present
Future Interns, Noida, Uttar Pradesh

- Architecting responsive UI components using Next.js, React, and TypeScript with focus on accessibility and cross-browser consistency.
- Implementing robust backend REST APIs and secure endpoints to power dynamic application workflows and data flow efficiency.
- Resolving performance bottlenecks through automated debugging and testing, cutting load latencies across devices.

Frontend Web Development Intern — Nov 2024 – Mar 2025
GrowthLink, Remote

- Refactored resource-heavy React components, boosting client-side rendering speed and improving Lighthouse score by 25%.
- Implemented real-time data sync hooks eliminating unnecessary manual page refreshes for end-users.

Web Development Intern — Jul 2024 – May 2025
Qveto Technologies, Noida, Uttar Pradesh

- Built the complete Job Listing module from ground up using React, Node.js, and MySQL with responsive UI across mobile and desktop.
- Optimized slow database queries with proper indexing and connection pooling, accelerating search response by 40%.
- Designed interactive analytics dashboards and forms that increased active user engagement by 30%.

KEY GITHUB & PRODUCTION PROJECTS

AI-Powered Recruiter Portfolio & Digital Twin | Next.js 16, React 19, TypeScript, OpenAI API, Tailwind CSS
Live: abhishekkumarmishraportfolio.netlify.app | GitHub: github.com/Abhishekmishra-04/Personal_Portfolio

- Built production-ready portfolio featuring an interactive AI Assistant chatbot trained on developer background with zero hallucination context.
- Engineered an automated Job Description (JD) Skill Matcher and an interactive Contact Form with server validation and 1-click link sharing.

Full-Stack Support Ticket Management System | TypeScript, Next.js, React, Node.js, Tailwind CSS, REST APIs
Live: support-ticket-system-olive.vercel.app | GitHub: github.com/Abhishekmishra-04/Support-Ticket-System

- Developed complete support ticket platform with role-based auth, ticket status progression (Open/In Progress/Closed), and SLA priority tracking.
- Designed responsive client dashboards with instant search, multi-factor filtering, and sub-100ms API response times.

Job Portal Web Application | React.js, Node.js, Express, MySQL, MongoDB
GitHub: github.com/Abhishekmishra-04

- Architected dual-database setup (MySQL for structured candidate/job listings and MongoDB for logging activity) avoiding search bottlenecks.
- Implemented role-based permissions, advanced candidate search filtering, and secure JWT authentication.

School Management System | React.js, JavaScript, Node.js, Tailwind CSS, Vercel
Live: school-management-system-six-phi.vercel.app | GitHub: github.com/Abhishekmishra-04/School-Management-System

- Created comprehensive academic management platform to register institutions, manage student directories, and track attendance records.
- Built responsive dashboards with clean RESTful modular endpoints for fast administrative operations.

Domain Checker & DNS Intelligence Tool | JavaScript, React, DNS APIs, Vercel
Live: domain-checker-amber.vercel.app | GitHub: github.com/Abhishekmishra-04/Domain-checker

- Built zero-latency domain availability search engine with asynchronous WHOIS lookups and live DNS record parsing.
- Implemented debounced query inputs and optimistic UI states handling hundreds of domain extensions effortlessly.

Task Management System | React.js, Node.js, Express, MySQL
GitHub: github.com/Abhishekmishra-04/Task-Management-App

- Engineered full-stack CRUD task tracking application with status state-machine (To Do, In Progress, Completed) and relational schema design.
- Designed intuitive UI with drag-and-drop capability and optimistic updates for smooth task organization.

ATS Job Search & Resume Matcher | Python, NLP, FastAPI, Machine Learning
GitHub: github.com/Abhishekmishra-04/ATS-Job-Search

- Developed intelligent applicant tracking system engine parsing candidate resumes against job descriptions to compute keyword match percentage.
- Implemented text preprocessing, entity recognition, and actionable gap analysis recommendations.

Expense Tracker & Financial Analytics | TypeScript, JavaScript, HTML5, CSS3, LocalStorage / SQL
Live: abhishekmishra-04.github.io/Expense-Tracker | GitHub: github.com/Abhishekmishra-04/Expense-Tracker

- Created responsive personal finance application with real-time balance calculations, category breakdown charts, and local data persistence.
- Implemented client-side input validation and transaction export features with zero external latency.

Netflix Clone & Media Streaming UI | React.js, TMDB API, CSS3, Vercel
Live: netflix-clone-t264.vercel.app | GitHub: github.com/Abhishekmishra-04/Netflix-clone

- Engineered responsive video-on-demand layout replicating hero trailers, category carousels, and poster grids with lazy image loading.
- Integrated real-time TMDB API caching to minimize redundant network requests during rapid scrolling.

Smart Bookmark Manager & Data Pipeline Dashboard | TypeScript, React, Python, Data Pipelines
GitHub: github.com/Abhishekmishra-04/Smart-Bookmark-App & data-pipeline-fullstack-dashboard

- Built productivity bookmark manager with tag-based filtering and automated OpenGraph metadata extraction.
- Designed automated Python ETL data pipeline extracting, transforming, and streaming analytical KPIs to full-stack dashboards.

CERTIFICATIONS & CODING ACHIEVEMENTS

- **AWS Academy – Data Engineering:** Designed and optimized secure cloud data pipelines and data ingestion architectures.
- **C++ Programming Certification – Coding Ninjas:** Advanced algorithmic problem solving, recursion, graphs, and dynamic programming.
- **Frontend Development with React & Node.js REST API Development:** Udemy Certified.
- **Coding Profiles:** Solved 300+ algorithmic problems across **LeetCode**, **CodeChef** (akmishra_24), **HackerEarth**, and active contributor on **StackOverflow**.
